

Samar Abbas

Software developer

PROJECTS

careSync

Developed during a hackathon, CareSync is a healthcare application offering disease detection, appointment booking, and location-based services for finding healthcare facilities. My role involved leading front-end development and implementing the appointment booking system and authentication on the backend.

UniUnity

UniUnity is an upcoming software designed to streamline buying, selling, and renting among college students. As the primary developer, I am responsible for both front-end and back-end development. UniUnity aims to enhance campus connectivity and convenience, currently in the development phase to bring this vision to life.

School Website

I built a school website facilitating teacher updates, student admissions, and online registration. Handling end-to-end development, I ensured a user-friendly interface and seamless functionality for enhanced communication and accessibility within the school community.

Gym Website

I developed a gym website featuring membership details, class schedules, trainer profiles, and online registration. My responsibilities encompassed end-to-end development, ensuring a seamless user experience for gym members and potential clients.

Educational Background

Bachelor of Technology

Zakir Hussain College of Engineering & Technology (AMU)

Sep 2022 - July 2026

- Computer Engineering

Intermediate

Delhi Public School, Roorkee

May 2019 - July 2021

- PCM

Contact
